## **COMPRESS**

**Latest DESIGN:** LEGO design reduces materials involved and makes the process of installation 90% more efficient.

**Urinal with a view Latest Installation:**  
@ red fort for a event of german  
embassy

### About Urinal:

This male urinal is made of recycled single use plastic, consists of a charcoal cartridge which filters out the urine and gets soaked by the earth, and is designed in a way to incorporate a plant which will soak out the filtered urine from the charcoal itself. Charcoal helps in suppressing the urine smell. This Urinal once installed has zero maintenance cost.

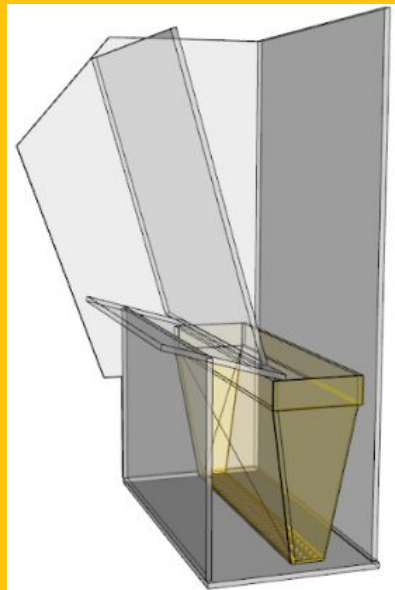

### Impact on Nature:

Weight - **55 Kg/ 2750 water bottles.**

Helps in saving **0.0935 tons of carbon emission** from going into earth's atmosphere.

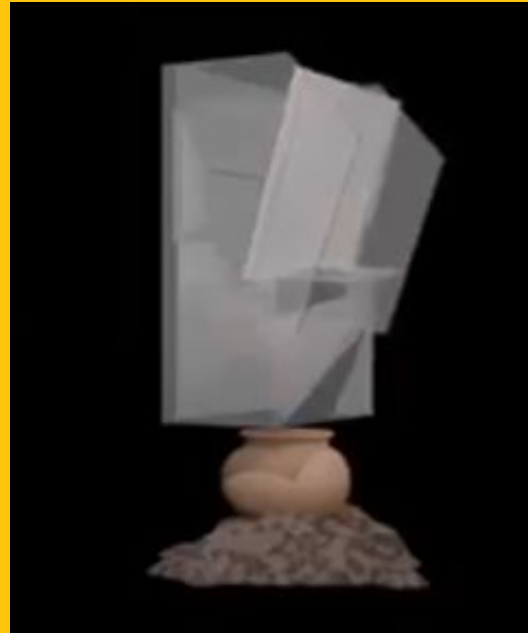

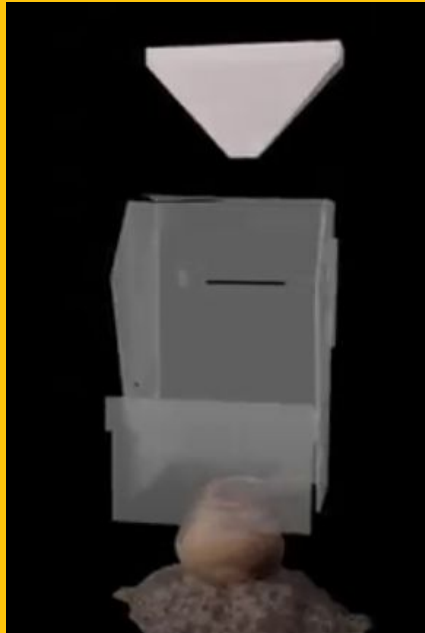

Helps in saving **0.407 cubic yard of land** from turning into **landfill**.

Helps in conserving **0.209 barrels of crude oil**.
